## CAREER OBJECTIVE

---

Entry-level Software Developer with knowledge of Core Java, JDBC, Servlets, Spring Boot, SQL, and REST APIs. Familiar with object-oriented programming, MVC architecture, and backend application development. Passionate about learning new technologies, solving problems, and building efficient web applications. Looking for an opportunity to start a career as a Java Developer and contribute to a growth-oriented organization.

## TECHNICAL SKILLS

---

**Programming Languages:** Java (OOPs, Collections Framework, Exception Handling)

**Backend Technologies:** JDBC, Servlets, Spring Boot, Spring MVC, Spring Data JPA, REST APIs

**Frontend Technologies:** HTML5, CSS3, JavaScript, jQuery, React (basic knowledge)

**Database:** SQL, Oracle Database (DDL, DML, Joins, Constraints)

**Tools & Platforms:** Eclipse IDE, Apache Tomcat, Postman, CI/CD, Git & GitHub, VS Code

## EDUCATION

---

**Bachelor of Technology in CSE (BPUT, Odisha) — 2023-2026**

Roland Institute of Technology, Berhampur. CGPA: 8.27/10

**Diploma in CSE (SCTEVT, Odisha) — 2021-2023**

S.M.I.T, Ankushpur. Percentage: 75.8%

## PROJECTS

---

**Employee Information Portal | Servlets, JDBC, Oracle**

- Built a web-based Employee Information Portal using Java Servlets and JDBC with a relational database.
- Improved login, registration, and employee view features with server-side validation.
- Designed relational database structures using Primary Key and Foreign Key constraints.
- Managed secure sessions and access control for authenticated users.

**Doctor Registration System | Spring Boot, Spring MVC, Oracle**

- Enhanced an MVC-based Doctor Registration System using Spring Boot and Oracle Database.
- Expanded CRUD functionalities using Spring Boot MVC, JDBC, and SQL queries.
- Created relational database schema with PK/FK constraints to maintain data integrity.
- Applied structured exception handling and efficient database connection management.

## EXPERIENCE

---

**Java Full Stack Intern — TechVizor, Surat | May 2026 - Present**

- Contributed to the development of the Smart Society web application using Java, Spring MVC, jQuery, Oracle Database, HTML, CSS, JavaScript, and Bootstrap.
- Developed backend modules, implemented business logic, and performed CRUD operations using Java, Spring MVC, and Oracle Database.
- Implemented WhatsApp and SMS API integration to send automated notifications and alerts to society members.
- Performed code reviews and debugging, resolving multiple functional issues and improving application stability.

## ADDITIONAL INFORMATION

---

**Languages:** English, Hindi, Odia

**Certifications & Achievements**

- Full Stack Java Programming Certificate
- Best Performer Award – Top 50 Hackfest 2026
